ABOUT US

Cetak Niaga is a company wholly owned by Bumiputera that is registered under the 1965 trade registration deed and began operating in 2018. Even though our company is still new, we have management and workers with more than 10 years of experience in the printing sector. Accordingly, we are able to provide solemn and brilliant printing quality to all our customers. With our ability to organise a neat and structured strategy, we have succeeded in helping many business people and various types of private and state companies obtain low and efficient printing costs.

After several years of operation, Cetak Niaga now has many regular customers and is widely recognised throughout Malaysia by walk-ins and online. With the advantage of an online marketing system, our sales have soared consistently and strengthened the company's finances from year to year.

At Cetak Niaga, we focus on several types of printing technologies, such as offset printing, digital printing, and inkjet printing. Each type of printing has its own advantages in terms of ink absorption, resolution quality, colour brightness, size accuracy, and so on. Therefore, various printing machines and equipment with international brands are used to produce unique and exclusive products in large and appropriate quantities without neglecting any form of quality.

Print Niaga aspires to become the largest printing factory on the east coast and throughout Malaysia. To realise this goal, we will provide unified printing services and friendly services as much as we can.
